

Pure Style
Pure Convenience
Pure Peace of Mind...

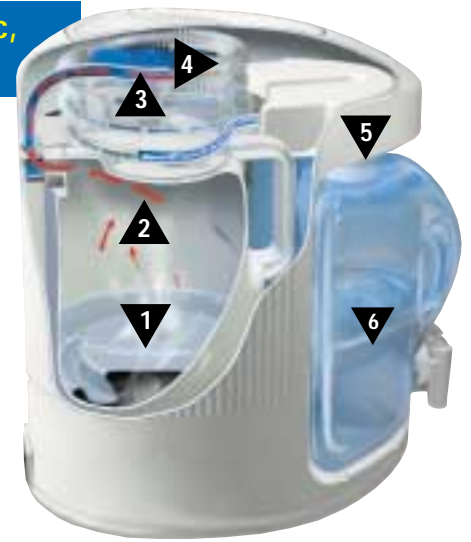

The Waterwise Model 9000™ features steam distillation with carbon filtration for *Maximum Purity*...effectively removing up to 99% of impurities. You will enjoy purified drinking water, the natural flavor of foods and the improved taste and appearance of beverages made with great tasting 100% homemade distilled water!

WATERWISE[®]
— Quality Since 1977 —
Purification Systems

The Waterwise 9000 Purifier Effectively Removes Contaminants such as Arsenic, Bacteria, Chemicals, Heavy Metals, Nitrates, Pesticides and Viruses.

1. Ordinary tap water is heated to 212° F (100° C) killing bacteria, cysts and viruses that may be present.
2. Steam rises leaving behind dissolved solids, salts, heavy metals and other substances.
3. Low boiling light gases are discharged through the gaseous vent.
4. Steam is condensed in the stainless steel coil.
5. Purified distilled water percolates through the coconut shell carbon filter, enhancing quality by adsorption of volatile organic compounds.
6. The purified water is collected in the one gallon polycarbonate storage bottle (included).

Wise Features

- Steam Distillation.....
- Contemporary Design.....
- Automatic Shutoff After One Gallon Cycle.....
- No Assembly or Installation.....
- Up to 5 Gallons Per Day.....
- 30 Minute Fan-Delayed Start.....
- Removable Boiler.....
- Stainless Steel Condenser – Not Aluminum.....
- Vent System.....
- Post Carbon Treatment.....
- GE Lexan® Polycarbonate Bottle.....
- Lightweight & Portable.....
- WQA Tested & Validated.....

Pure Benefits

- Purity Guaranteed** 100% distilled
- Pure Style** complements your decor
- Pure Performance** operates with ease and efficiency
- Pure Convenience** no water hookups
- Consistently Fresh** for drinking and cooking
- Improves Efficiency** enhances operation
- Designed** for easy filling and cleaning
- Pure Peace of Mind** non-leaching
- Precision Engineering** reduces volatile organics
- Maximum Purity** enhanced by organic carbon
- Convenient** collector/dispenser bottle
- Pure Simplicity** for easy traveling and storage
- Pure Integrity** quality ensured

Model 9000 Specifications

- WQA Validated – Awarded the S-400 Gold Seal
The Water Quality Association (WQA) prestigious Gold Seal is a mark of product quality awarded only to water treatment equipment that meets or exceeds industry standards for contaminant reduction, performance, structural integrity and materials safety.
- Distillate Capacity 1 Gallon (3.8L) in 4.5 Hours
 Up to 5 Gallons (19L) in 24 Hours
- Space Saving Dimensions
15" (38 cm) Height 16" (41 cm) Depth 9.5" (24 cm) Width
- Net Weight 10 lbs (4.5 kgs)
- 120VAC/60Hz 750W • International 230VAC/50Hz 750W
- 1 Year Limited Warranty
- UL Listed
- CSA Certified
- CE Certified
- USA & Foreign Patents
- Made in USA

The removable boiler is easy to fill and clean.
